Prime Minister

SIMPLIFIED NEEDS ASSESSMENTS

Last year in E(LF) we agreed the basis for determining needs assessments in the new system of local government finance. Since then my officials have taken forward this work in consultation with officials from relevant departments. They have now produced a package of options some of which are firmer than others. These are described in the enclosed paper which is in the form of a note to go to the local authority associations.

For most services there are a number of options which produce overall assessments ranging from broadly in line with present assessments to ones more favourable to inner city areas including inner London. The effect of the latter options would be to reduce community charges in inner London boroughs typically by around £100. Illustrative effects on community charges are shown in the enclosed table: these are based on:

- a. options more favourable to shire areas,
- b. a broad mix of options and,
- c. options more favourable to urban areas.

I must stress that these are purely illustrative at this stage and are intended simply to demonstrate the potential scale of the changes that might be made when we come to take decisions on new needs assessments. In particular they are based on 1988/89 budgets which for some authorities, such as Brent, understate real expenditure through the use of various creative accounting arrangements.

The next stage in developing the simplified needs assessments is to discuss the options with the local authority associations. To this end officials have drafted a set of consultation papers for each of the service assessments. These contain some exemplifications of the effects on individual service needs assessments but there will be no reference to an overall package nor to the implications for community charges. Copies of the service annexes have been sent to officials in relevant departments.

We are under considerable pressure from the local authority associations to initiate the promised consultation on needs assessment. I would like to start consultation immediately so that officials have time to resolve all the technical issues and present us with final options next summer. I would be grateful for your agreement to my initiating consultation with the local authority associations on the basis of the enclosed paper and for the agreement of colleagues to the relevant annexes.

I am copying this to other members of E(LF) and Sir Robin Butler.

N R /S November 1988

DRAFT PAPER TO NEW SYSTEMS WORKING GROUP

SIMPLIFIED NEEDS ASSESSMENTS

- 1. The yellow booklet "The New Grant System"- set out the government's proposals for needs assessments in the new grant arrangements to be introduced in 1990. It noted that the methodology for making assessments should be much simpler than at present, that it should be more understandable to local tax payers, that it should be more stable, and that it should reflect needs no less fairly than the present GREs. This paper reports on progress on developing new needs assessments and invites the New Systems Working Group to set up a sub group to examine the proposals in more detail.
- 2. At present there are 63 separate GRE components for services. Ministers have announced that in the new system there should be many fewer assessments but that there should be separate assessments for every local authority and for each of the major local authority services. We now propose that there should be 12 separate service assessments in the new system. There should be four education assessments for primary, secondary, tertiary and other education; three personal social services assessments for children, elderly and other PSS; separate assessments for police, fire, highway maintenance, and capital expenditure; and a single assessment for all other services.
- 3. At present GREs are based largely on a client group/unit cost approach with an appropriate adjustment for the special needs associated with particular services, and an adjustment for higher costs in London. Where appropriate we propose to adopt a similar approach in the new needs assessments. The options for the new needs assessments are described in the attached annexes.

SUMMARY OF OPTIONS

- 4. Education: the present GRE components for education are fairly simple in form and have proved stable in practice. The main simplification proposed here is to rationalize the present 12 education components and reduce them to 4. These would cover primary, secondary, tertiary and other education. As at present the new assessment would allow for variations in the number of pupils, the number of pupils with additional educational needs, sparsity, and higher costs in London.
- 5. Personal Social Services: The present GREs for personal social services are the most complex of all. The scope for simplification on these services lies most in removing the redundant elements of the present assessments rather than reducing the number of separate assessments. We propose to retain separate assessments for children's services, services for the elderly, and the block of other services including those for the mentally and physically handicapped.
- 6. Two research projects have been undertaken to provide evidence for new needs assessments. The first by Kent University looked at children's services. The initial results of this work have already been reported to the local authority associations. A second option for this needs assessment is to draw on the results of the Kent research in order to construct a simplified version of the present arrangement.
- 7. The second research project was undertaken by York University into services for the elderly. They have produced a number of options all of which are much simpler than the present GRE. As with the children's GRE further work is in hand to develop these options.
- 8. For the other personal social services element we propose either to retain the existing methodology, which consists of a simple regression of expenditure against population and an index

- of social deprivation, or to distribute this element in proportion to the sum of the PSS components for children and the elderly.
- 9. Police: The present GRE for police is based on police establishments as approved by the Home Secretary. Within London the GRE of the Metropolitan Police is taken to be its budgeted expenditure on police services for the year as approved by the Home Secretary. We are proposing either to retain this methodology exactly as it is in the new system, or to include an allowance for the number of civilian staff employed by these We have already discussed the second option with the local authority associations in the context of the 1989/90 settlement. We will continue this discussion in the context of new needs assessments. Considerations here are implications for incentives for efficency, and privatisation of civilian work.
- Fire and Civil Defence: The present GRE is distributed on the basis of a number of indicators such as population, density, number of fires, and high fire risk areas with the relative weights for these factors being derived from a regression against expenditure. We had hoped that better information categorization of areas according to the level of fire risk would provide a basis for the new needs assessment. But the necessary data may not be available in time for use in new needs assess-The options for this service are either to retain more or less the present methodology or to switch to a needs assessment based on establishments.
- 11. <u>Highway maintenance</u>: We propose to retain a separate needs assessment for highway maintenance in the new system but other transport services will be covered by the other services needs assessment. For highways maintenance we propose an assessment which allows both for the length and type of roads for which an authority is responsible, and the degree of usage on the

- oads. As at present we propose to include a separate indicator to allow for the higher cost associated with severe weather conditions to take account of the cost of winter maintenance.
- 12. Financing costs of Capital Expenditure: At present the treatment of capital financing costs within the GRE system is not uniform. Debt charges on expenditure incurred before 1981/82 are in most cases distributed on the same basis as current expenditure for the particular service. Financing costs for capital expenditure incurred since April 1981 have been included within a separate GRE component distributed on the basis of individual authorities' allocations.
- 13. For the new system our objective is, as far as possible, an integrated needs assessment for financing costs of capital expenditure whenever it was undertaken. The financing costs of capital expenditure incurred before April 1990 can be taken into account on the basis of past needs assessments, past capital allocations, or outstanding debt at March 1990. Or they could be distributed on the basis of needs assessments for current expenditure.
- 14. We propose that annual capital, guidelines should form the basis of the allowance for financing costs on capital expenditure incurred after April 1990.
- 15. The capital consultation paper proposes that half cash-backed capital receipts in 1990 and half of future capital receipts must be set aside for debt redemption or as a substitute for future borrowing. This will reduce the financing costs to be allowed for in the needs assessments. This use of receipts could be allowed in the needs assessment of the individual authorities setting aside receipts, apportioned across all authorities, or an intermediate position taken with part allowed for locally and part apportioned.

- Other services: We are proposing that all remaining 16. services should be combined into a single block. This provides the greatest scope for simplification amongst all of the Because of the diversity of services included in this block there are only a limited number of approaches which can be used to distribute it. The simplest would be to use a single indicator, such as population but this would take no account of the varying needs of authorities. We therefore to take account of a number of other factors which are thought to affect the cost of supplying a standard level of service for this group of services. The indicators we propose to use are population (with an allowance for the daily inflow of commuters), density of population, sparsity and an indicator of social deprivation. We propose to use a regression against past expenditure to inform the weights to be assigned to each of these indicators.
- 17. Area cost adjustment: At present a cost adjustment is made for London in respect of labour costs. This reflects the extra non-discretionary costs which London authorities face in providing a standard level of service. It is based on a comparison of wage rates using data from the New Earnings Survey. This method allows for variations in pay but some authorities have argued that it may not allow fully for all the higher costs of local authorities in London. We propose to examine this further.
- 18. Next Steps: This paper outlines the proposals for new needs assessments but there is still a lot of detailed work to be done and a number of technical issues to be resolved. We suggest that a Needs Assessment Sub Group be set up to carry this work forward.

The New Systems Working Group is invited:

- a) to comment on the proposals for new needs assessment; and
- b) to set up a Sub Group to carry forward the development of the new needs assessments.

NOTES

COLUMN 1 SHOWS PUBLISHED COMMUNITY CHARGES FOR 1988/89 WITHOUT ALLOWANCE FOR THE TRANSITIONAL SAFETY-NET, BUT ADJUSTED TO ALLOW FOR THE EFFECTS OF ABOLISHING ILEA AND RING-FENCING THE HOUSING REVENUE ACCOUNT (HRA).

THE ILEA AND HRA EFFECTS ARE PROVISIONAL AT THIS STAGE, AND WILL BE PHASED IN DURING THE EARLY 1990'S THROUGH THE TRANSITIONAL SAFETY-NET.

COLUMN 2 ILLUSTRATES 1988/89 COMMUNITY CHARGES WITH SIMPLIFIED NEEDS ASSESSMENTS GENERALLY FAVOURABLE TO THE SHIRE AREAS IN PLACE OF 1988/89 GRANT RELATED EXPENDITURE ASSESSMENTS (GRES). THE EFFECT OF THIS CHANGE TO NEEDS ASSESSMENTS ON COMMUNITY CHARGES IS SHOWN IN COLUMN 3.

SIMILARLY COLUMNS 4 AND 5 ILLUSTRATE THE EFFECTS OF A FAIRLY CENTRAL SET OF SIMPLIFIED NEEDS ASSESSMENTS.

COLUMNS 6 AND 7 ILLUSTRATE THE EFFECTS OF SIMPLIFIED NEEDS ASSESSMENTS FAVOURABLE TO INNER CITY AREAS.

QUEEN ANNE'S GATE LONDON SWIH 9AT

21 November 1988

Dear Micholan, SIMPLIFIED NEEDS ASSESSMENTS

Thank you for copying to me your minute of 15 November to the Prime Minister. I am content with your proposal to consult the local authority associations and with the paper describing how Home Office services are to be treated under the new arrangements, although I understand that officials still have one or two points to resolve.

Copies of this go to the recipients of your minute.

Your, Dony'r.

The Rt Hon Nicholas Ridley, MP Department of the Environment

COPIES TO Pr

PRIME MINISTER

SIMPLIFIED NEEDS ASSESSMENTS

I have seen a copy of Nicholas Ridley's minute to you of 15 November about simplified needs assessments.

I welcome Nick's paper and his intention to start consultations very soon. The inner London boroughs have a particular interest in the proposals for education needs assessments in the context of the transfer of education responsibilities from ILEA and they have been pressing hard for the publication of the paper. I hope it will be possible for it to issue before the end of November. The boroughs are likely to press for final decisions on the education needs assessments to be taken as early as possible next year, but this is something I shall discuss separately with Nick.

Copies of this minute go to other members of E(LF) and Sir Robert Butler.

SIMPLIFIED NEEDS ASSESSMENTS

Thank you for sending me a copy of your minute of 15 November to the Prime Minister.

The proposals our officials have devised for the coverage of transport are very much simpler and more satisfactory than the present system, whilst recognising the differing responsibilities of local authorities in London and the Metropolitan areas.

I want, however, to put up an early marker against the option for the treatment of capital receipts, which would spread the allowance for them evenly across all authorities. I am strongly opposed to this because it would perpetuate in the needs assessment the unfairness which has been such a problem in the present capital control system.

This is, however, only an option in the paper. and need not hold up its circulation. I think it is very important that you should be able to circulate it before the end of November. There is little enough time to deal with all the detailed technical issues that arise. and my Department has also been under considerable pressure to reveal proposals on the transport and capital need assessments.

I am sending a copy of this letter to the Prime Minister, other members of E(LF) and Sir Robin Butler.

NEEDS ASSESSMENT

I was interested to see Nicholas Ridley's minute to you of 15 November outlining his progress on simplifying needs assessments in England for the new system of local government finance.

I have also been reviewing need assessments in Wales. The simpler structure of local government here means that assessments in Wales are already less complex and more stable than in England, so fewer changes have been needed. In fact the county councils have expressed themselves content with their present formula and I see no reason to seek to change it. The district councils are considering a relatively small change to their needs assessment which has the effect of moving resources towards the Valley areas, and if they bring forward an acceptable proposal I am willing to accommodate them on this. I expect to have agreement on a revised formula early next year.

I am copying this minute to other members of E(LF) and to Sir Robin Butler.

SIMPLIFIED NEEDS ASSESSMENT

You wrote to the Prime Minister on 15 November with proposals to issue a consultation document setting out your ideas for a simplified needs assessment.

I agree that we should act quickly in seeking views on the proposed changes and I am content with the annexes.

I am sending copies of this letter to recipients of your minute.

JOHN MOORE

PRIME MINISTER

SIMPLIFIED NEEDS ASSESSMENTS

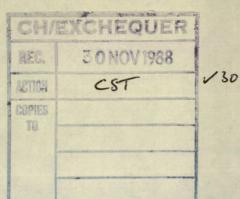

I have seen a copy of Nicholas Ridley's minute to you of 15 November about simplified needs assessments. I welcome his proposal to consult the local authority associations on the basis set out in his paper.

The paper proposes continuing to use New Earnings Survey data in calculating area cost adjustments. There are some difficulties in using this data for small areas and for some occupations because of the small size of the sample used. Nick's officials may like to discuss these with my statisticians to ensure that the new system takes these limitations into account as far as possible. The official dealing with this here is Mr C Lewis who can be contacted on 273 5569.

Copies of this minute go to other members of E(LF) and Sir Robin Butler.

From the Private Secretary

29 November 1988

Dear Rose,

SIMPLIFIED NEEDS ASSESSMENTS

The Prime Minister was grateful for your Secretary of State's minute of 15 November and the Chief Secretary's minute of 25 November.

The Prime Minister is content for the consultation process to proceed on the basis set out by the Chief Secretary.

I am copying this letter to the Private Secretaries to members of E(LF) and to Trevor Woolley (Cabinet Office).

PAUL GRAY

Roger Bright, Esq., Department of the Environment.
